

## ABSTRACT 2: For Culture & Gender Video (*Irua* to GitHub)

### English:

This presentation explores the profound parallels between Kikuyu cultural frameworks and modern software engineering practices. We analyze *Irua* (the rite of circumcision) as a design pattern for transformative learning and identity formation, drawing direct links to the intense initiation of coding bootcamps. We then examine *Gĩtĩo* (communal labor) as the blueprint for Agile collaboration and teamwork. The talk offers an honest discussion on gender roles within these traditions, highlighting the central, powerful roles women have always played as system architects—both in the family and in directing futures. The conclusion is a vision for a culturally-grounded, inclusive engineering philosophy that builds stronger, more empathetic technology.

### Kiswahili:

Mada hii inachunguza sawa kuu kati ya mifumo ya kitamaduni ya Kikuyu na mazoea ya kisasa ya uhandisi wa programu. Tunachambua *Irua* (tamasha la tohara) kama muundo wa kubuni kwa ajili ya mafunzo ya mageuzi na uundaji wa utambulisho, tukiongoza miunganisho ya moja kwa moja kwenye mwanzo mkali wa mafunzo ya programu. Kisha tunachunguza *Gĩtĩo* (kazi ya pamoja) kama mwongozo wa ushirikiano wa Agile na timu. Hotuba inatoa majadiliano ya kweli kuhusu jinsia katika mila hii, ikasisitiza jukumu kuu na lenye nguvu ambalo wanawake wamekuwa nalo daima kama wasanifu wa mifumo—katika familia na katika kuongoza maisha ya baadaye. Hitimisho ni maono ya falsafa ya uhandisi iliyojikita katika tamaduni, inayojumuisha na kujenga teknolojia imara na yenye huruma.

### Kikuyu:

Ũhoro ũyũ ũgakorwo ũkĩona ũrĩa ũtheri ũrĩ kũrĩ gĩkundi kĩa Kĩkũyũ na mĩthemba ĩrĩa ĩrĩ na hitho ya gĩtũngati. Tũrĩ gũtanganĩria *Irua* ta mwario wa gũteng'era wa gũthoma na gũtũma mbere wa mwene.
