

ABSTRACT 3 For Societal Challenge Video (Digital Divide)

English:

This presentation reframes the "digital divide" beyond mere connectivity, defining it as a crisis of relevance, literacy, and access. From the perspective of a software engineer raised in rural Laikipia, it argues that technology often fails remote communities because it is designed for different realities. The talk presents a case study of an AI job-matching platform (Skill Match AI) and proposes a visionary solution: an offline-first, voice-based agricultural advisory system for farmers. It outlines a set of design principles for "bridge-building" technology and issues a call for a new generation of culturally intelligent engineers who can translate community needs into robust, life-serving code.

Kiswahili:

Mada hii inabainisha tena "mgawanyiko wa kidijitali" zaidi ya muunganisho, na kuufafanua kama mgogoro wa umuhimu, ujuzi, na upatikanaji. Kutoka kwa mtazamo wa mhandisi wa programu aliyelelewa mashambani Laikipia, inasema kuwa teknolojia mara nyingi inashindwa kuwahudumia jamii za mbali kwa sababu imeundwa kwa ajili ya hali tofauti. Hotuba inawasilisha uchambuzi wa kina wa jukwaa la AI la kuendana na kazi (Skill Match AI) na inapendekeza suluhisho la kiutabiri: mfumo wa ushauri wa kilimo unaotumia sauti na kufanya kazi nje ya mtandao kwa wakulima. Inaelezea kanuni za kubuni kwa teknolojia ya "kujenga madaraja" na inatoa wito kwa kizazi kipya cha wahandisi wenye akili ya kitamaduni wanaoweza kutafsiri mahitaji ya jamii kuwa msimbo thabiti unaohudumia maisha.
