Backend-focused Full-Stack Software Engineer with hands-on experience building backend systems using Node.js (Express) and TypeScript in real product environments.

Experienced in developing RESTful APIs, implementing backend business logic, and collaborating in team-based development settings. Strong interest in building scalable, user-centered products, with additional frontend experience using React, Angular, and TypeScript.

EXPERIENCE

Backend Developer.

Dekut Startup & Incubation Center | *Sept 2025 – Dec 2025*

- Contributed to the development and maintenance of backend services using **Node.js (Express) and TypeScript**.
- Designed and implemented **RESTful APIs** to support core system functionality.
- Implemented backend business logic, authentications, and error handling.
- Worked collaboratively with other developers using **Git and GitHub**.
- Assisted in developing selected frontend features using **React and TypeScript**.
- Participated in debugging, testing, and improving system stability.

Software Development Trainee (Full-Stack)

Teach2Give Software Training Program | *Feb 2025 – Mar 2025*

- Completed an intensive hands-on training program focused on QA-QE full-stack development.
- Built backend applications using **Express.js (Node.js) and TypeScript**.
- Implemented API endpoints, middleware, and backend workflows.
- Gained exposure to **GitHub Actions (CI basics)**, **Docker fundamentals** and **Jest fundamentals** for testing
- Worked in team-based development environments following industry best practices.

PROJECTS

Skill Match AI: AI-Powered Job Matching Platform (*Angular, Node.js (Express), TypeScript, PostgreSQL*)

- Designed and developed an AI-powered platform that matches students and job seekers with relevant job opportunities based on their skills.
- Built backend services and RESTful APIs using **Node.js (Express) and TypeScript** to handle job matching logic and user management.
- Developed role-based dashboards for **job seekers and employers** to streamline recruitment and candidate discovery.
- Implemented database relationships using **PostgreSQL with Type ORM**.
- Focused on improving job matching accuracy and user experience.

EDUCATION

BSC. Information Technology. (Dedan Kimathi University of Technology)
(2022 -present)

- Active member of the Google Developer Group on Campus, collaborating on tech projects and initiatives.
- Participated in various hackathons hosted by the university, gaining hands-on experience in problem-solving and teamwork.
- Covered coursework includes Software Engineering and Database Management Systems and Aspects of AI.

TECHNICAL SKILLS

- **Backend:** Node.js (Express), TypeScript
- **Frontend:** Angular, React.js
- **Databases:** Postgres with Type ORM for relationship
- **Tools:** Git, GitHub, GitHub Actions (CI basics)
- **DevOps:** Docker (fundamentals)
- **Design:** UI/UX (Figma)

CERTIFICATION

- Linux essentials with a certificate from Cisco
- Full-Stack Software Development Certificate — Teach2Give
